Practical Information for the Zagreb Cathedral Visit

Introduction

Please note a minor change regarding the starting point of the visit – instead of gathering at Ban Josip Jelačić Square, as previously announced, we kindly ask all participants to **meet in front of Zagreb Cathedral at 16:00 CET**. The Cathedral is located just a few minutes' walk from the main square, and assembling directly at the site will allow us to keep to the schedule.

All photographs provided by the Faculty of Civil Engineering, University of Zagreb / Croatian Centre for Earthquake Engineering.

When registering for the 20th Annual Meeting, participants were able to opt for additional viewing locations (ascents) as part of the visit to the Cathedral. As weather conditions are now expected to be favourable, here below a few practical details about the visits.

Protective safety helmets will be provided to each participant at the beginning of the site visit.

For Participants Not Wishing to Take Part in the Ascents

Participants who prefer not to join the ascents are invited to remain inside the Cathedral. During this time, you will have the opportunity to explore the naves and sacristy in greater detail and engage in discussion with the experts guiding the visit.

Optional Viewing Locations

Participants interested in the additional viewing experiences will have the opportunity to visit:

- the viewing platform at the top of the Cathedral towers;
- the Cathedral roof structure (roof space).

Cathedral Towers

The tower platforms are accessed by two construction lifts equipped with safety railings and accommodating up to seven people each. Although the visit to the tower platforms will be time-limited, it offers a rare opportunity to enjoy spectacular panoramic views of Zagreb.

Cathedral Roof Structure

Roof structure is accessed by a construction lift equipped with a protective safety cage, with a capacity of up to twelve people. This part of the visit will include expert commentary on both the historic roof structure and the structural rehabilitation works following the 2020 earthquakes.

Organisation of the Visit

For safety reasons, as well as to ensure that participants can fully appreciate the different aspects of the programme, all instructions will be repeated on site before the tour begins.

Every effort will be made to ensure that all interested participants have the opportunity to visit both the roof and the tower during the course of the programme.

We look forward to welcoming you at 16:00 CET in front of Zagreb Cathedral!
