“Better living”
“Besser leben”
“Mieux vivre”
“Vivere meglio”

The Swiss Confederation will organize a "Year of Better Living" in 2026, in collaboration with partners from all sectors and targeting the general public. The central theme will be the question of what kind of space we want to live in in the future, with a view to achieving greater sufficiency in the future.

It's important to open up a wide-ranging discussion with the general public about quality in our built environment, and in particular with view to the sustainable development in the broadest sense.
